

ROLLAND MUHANGUZI

Full-Stack Developer · AI Product Builder · Solo Founder · Information Systems Student

Northern Cyprus · Open to Remote & Relocation · muhanguzirollands@gmail.com · +90 533 842 5559
github.com/Rollandcodes · cypai.app · linkedin.com/in/rolland-muhanguzi · whop.com/cynosurescales

AT A GLANCE

	Shipped 3 revenue-generating products (SaaS, digital courses, automation packs) as a solo founder while studying full-time.
	Built and debugged production-grade systems: multi-tenant CRM, Paddle payment flows, Whop iframe auth, CI/CD pipelines on Vercel.
	Operates across two languages (English + Turkish) in a foreign market — a 73-lead outreach pipeline with bilingual copy built from scratch.
	Ships AI-native products: Claude API, OpenAI Whisper, n8n automations, chatbot integrations — not just tutorials, live user-facing apps.

EXPERIENCE

Founder & Full-Stack Developer · [CypAI](https://cypai.app) · cypai.app

Jan 2026 – Present

- **Architected and launched a multi-tenant SaaS platform from zero** — chatbot, CRM, bookings, follow-up automation, WhatsApp integration, and analytics dashboard — using Next.js 14, TypeScript, Supabase, and Vercel.
- **Resolved critical production incidents:** Paddle sandbox/live misconfiguration causing payment failures on live users; broken Vercel CI/CD build chains; Whop iframe auth rewrite using @whop/sdk.
- **Acquired paying customers within 3 months** with zero funding — validated go-to-market through a 73-lead bilingual (English/Turkish) WhatsApp & email outreach pipeline.
- **Full product ownership:** roadmap, UX (Linear/Vercel-inspired dark SaaS aesthetic), dev, deployment, customer support, and iteration.

Developer & AI Automation Specialist · [Freelance \(CypAI Agency\)](#)

2025 – Present

- **Delivered client websites using Webflow, Wix, and Framer**, including a full car-dealership site for Akgürcü Motors (Northern Cyprus) built entirely via Wix MCP tooling.
- **Built and sold n8n automation workflow packs** as exportable digital products on Whop (RollandAutomates), hosted on a self-managed n8n cloud instance.
- **Designed and executed a 'free sample first' pitch strategy** for local SMBs — offering Google Maps SEO, social media content, and email newsletters as lead-in services.

Copywriting & Digital Products Founder · [CynosureScales](https://cynosurescales.com) · whop.com/cynosurescales 2024 – Present

- **Created and launched multiple Whop products:** Copy That Converts Course, Email Sequence Swipe Kit, The Ad Copy Vault — with product descriptions, cover assets, and creator outreach templates.
- **Shipped Pulse AI**, an embedded Whop app (github.com/Rollandcodes/pulse-ai-whop), a fully functional in-community AI assistant.

Pine Script Developer · [Quantitative / Trading Projects](#)

2024 – Present

- **Built a custom SMC/ICT multi-pair indicator** covering 8 JPY/CAD pairs on M15 timeframe in Pine Script v6.
- **Developed 'Precision Breaker + Sweep [Pro]' for XAUUSD**, combining liquidity sweep detection, z-score impulse filtering, and ATR-based SL/TP levels — applied to personal XAUUSD scalping strategy.

PROJECTS

Ostra Clips · [AI Content Repurposing Tool](#) · [Active Build](#)

2026

- ▶ Tagline: "Paste a video. Get 30 pieces of content. Done."
- ▶ **Stack:** Next.js 14, Supabase, OpenAI Whisper, Claude Haiku — payments deferred to validate core flow first (lean product thinking).
- ▶ Handles transcription → content generation pipeline end-to-end; designed for creators and agencies.

PainPointRadar · [AI Research Automation](#)

2025

- ▶ Automated forum/Reddit scraping pipeline that surfaces validated customer pain points for product ideation — used to validate CypAI's market before building.

CypAI Websites Portfolio · [Webflow + Wix Agency Work](#)

2025 – Present

- ▶ Live portfolio: cypaiwebsites.wixstudio.com/my-site — client projects for Northern Cyprus SMBs across hospitality, automotive, and retail.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL

Frameworks: Next.js 14, React, Flask, Django

Databases: PostgreSQL · Supabase · SQLite

DevOps / Cloud: Vercel · Netlify · GitHub Actions · Docker · CI/CD

AI & APIs: Claude API (Anthropic) · OpenAI Whisper · n8n · Paddle · Whop SDK

No-Code / Design: Webflow · Wix (MCP) · Framer · Figma

Other: Pine Script v6 · REST APIs · Git · Bilingual outreach (EN/TR)

EDUCATION

BSc Information Systems & Technologies · [European University of Lefke, Northern Cyprus](#)

2025 – Present

- ▶ Relevant coursework: Databases, Algorithms & Data Structures, Systems Analysis, Web Technologies, Business Information Systems.
- ▶ Building real products that apply academic concepts in production environments alongside full-time study.

ADDITIONAL

Languages: English (Fluent) · Turkish (Beginner)

Background: Ugandan national based in Northern Cyprus — adapted to operating in multilingual, cross-cultural business environments.

Interests: Forex trading (XAUUSD scalping, SMC/ICT methodology) · Architectural design · AI product research

Availability: Immediately available for internships, part-time, remote, or freelance engagements.
